

Red Alert Floor Cleaner and Color Revitalizer Auto Dilution System

Red Alert Cleaner in our easy to use Auto Dilution System mixes the exact amount of cleaner every time with no waste. ADS eliminates the hassle of cabinet installation, makes maintenance easier, and helps accurately measure the amount of product your team uses.

Clean any surface not harmed by water alone with this no-rinse, all purpose cleaner. It is a gentle and effective cleaner ideal for use, in schools, office building, restaurants, and many other commercial and institutional facilities. This cleaner is very economical and easy to use.

No rinse cleaners do not leave a visible residue when dry and this is why you need to use our cleaner with Red Alert Wax. Change water frequently when mop water becomes dirty to avoid a residue. This will help prolong the shine and color changing properties of our floor polish.

Directions For Use

You must use our specially designed cleaner to maintain our floor safety product ability to warn of hazardous spills. If you do not use Red Alert Cleaner then we can not grantee that our floors will perform as stated.

Daily use:

Hook directly to your janitorial sink hose and add directly to your cleaning bucket or into your automatic scrubber. Our dilution system will mix the correct amount cleaner for you, saving cleaner and lowering your cleaning product cost.

Safety Directions:

Wear safety equipment as recommended on our SDS, and place our wet floor signage down before you begin cleaning.
