# Red Alert Floor Cleaner and Color Revitalizer 1 Gallon Container

Red Alert Cleaner and Color Revitalizer has been formulated for safe everyday use on Red Alert Wax floor safety coating. Its unique formula cleans without causing a dulling film and enhances our safety coating which changes RED to warn the public that the floor is wet.

It is a gentle and effective cleaner ideal to use in schools, office buildings, restaurants, and many other commercial and institutional facilities that have our floor safety coating applied. This cleaner is very economical and easy to use.

Our no rinse cleaner will not diminish our products color changing ability and has been designed to work with our floor safety coating product. Change water frequently when mop water becomes dirty to avoid a residue. This will help prolong the shine and color changing properties of our floor safety coating.

# **Instructions For Use**

You must use our specially designed cleaner to maintain our floor safety product ability to warn of hazardous spills. If you do not use Red Alert Cleaner, then we can not grantee that our floors will perform as stated.

## Daily use and light soils:

Dilute: 1 ounce per gallon of cold water

#### For Moderate to Heavy Soils:

Dilute: 2 ounces per gallon of cold water

Apply as you would with any cleaner, normally but there's no need to rinse. Rinsing may be required if you use this in a heavy soiled area.

#### For Automatic Scrubbers:

Dilute: 2 ounces per gallon of cold water

Apply, scrub and pickup as you would with any ordinary low-foam cleaner. No need to rinse.

## Directions

Wear safety equipment as recommended on our SDS, and place our wet floor signage down before you begin cleaning.
