

The logo features a stylized red wax splatter graphic on the left. To its right, the text "Red Alert Wax" is written in a bold, sans-serif font, with "Red" in red and "Alert Wax" in black. Below this, the words "Floor Safety Coating" are written in a smaller, black, sans-serif font.

Red Alert Wax Floor Safety Coating

Red Alert Floor Safety Coating was developed to help reduce the number of slips and falls due to accidental spills. When you see a shiny clean floor, you assume it is clear of any slip hazards, however most spills are from water, which are not visible. That is why we developed a safety coating system that will turn the spill a reddish color to warn the public that the floor is wet and to avoid the area. The color changes within the first 3 to 10 seconds of the water hitting the floor, making it an early wet floor warning system. Red Alert Wax Coating has given you a new reason to wax and protect your floor and your business like never before—our solution warns people where the spills are, and to avoid them. After spills are cleaned up, and the floor is dry, it will go back to its original shiny waxed floor that everyone is accustomed to seeing.

DIRECTIONS FOR USE:

1. Completely strip all old wax or floor finish using normal floor stripper. Wet vacuum all stripping formula from floor and rinse completely 3 to 4 times.
2. Apply Red Alert floor safety coating in a uniform heavy coat with some overlapping. Allow 30 to 40 minutes to dry throughout and is dry to the touch. Apply additional coats in the same manner. The recommended coats are 3 to 4 total coats.
3. Our product does not need to be burnished, except if you are using our Spray Buff Cleaner.

DIRECTIONS FOR MAINTAINING COLOR REACTION AND WARNING SYSTEM:

Apply a small amount of water to test the floor weekly to assure that coating is still reacting and changing color. Approximately 4 to 6 months after first application, it may be necessary to apply additional floor coatings. If so, then do a light scrubbing with Red Alert Cleaner and repeat step 1-3 again. To keep your floors changing color to warn the public that there is a spill you **must** use our Red Alert Floor Cleaner.

- **DO NOT DILUTE, BURNISH BETWEEN COATS, OR BURNISH FOR AT LEAST 3 DAYS AFTER APPLICATION.**
- **DO NOT APPLY WATER TO NEW FLOOR AREA FOR AT LEAST 24 HOURS BECAUSE IT WILL SPOT YOUR FINISH.**

PRECAUTIONARY STATEMENTS

Obtain special instructions before use. Wear protective gloves, protective clothing, eye protection and face protection. Avoid contact with skin and eyes. Do not swallow. Handle and open container with care. When using product do not eat, drink or smoke. Do not handle until all safety precautions have been read and understood.
